Navigate the world of threats and risks

www.riskintelligence.eu

Risk Intelligence is a leading global supplier of threat and risk assessments at sea and in ports.

The company has developed a technology platform that is the foundation for strong growth and is now ready to multiply its operations.

Risk Intelligence's current customer base is estimated to approximately 12 percent of the world's total trading fleet. With the emission allowance and the planned listing, the company will be able to accelerate its marketing while expanding its market to cover land risks (LandRisk), which represents a 20-fold larger market than for coast, sea and port.

Risk Intelligence objective is to launch its new product LandRisk in Q3 2019

Summary of the offering

Subscription Period: 16 - 31 July 2018.

Issue price: 6,25 DKK per share.

Subscriptionpost: The minimum subscriptionpost is 700 shares corresponding to DKK 4,375.

Volume of Issuance and minimum execution limit: The offer includes maximum of 1,920,000 shares, corresponding to DKK 12,000,000 (approximately SEK 16,440,000)*. The minimum limit for the right issue is DKK 7,200,000 (approximately SEK 9,864,000)*.

Number of shares before the issue: 5 749 140 shares.

Valuation (pre-money): Approximately 35.9 m DKK, corresponding to approximately 49 m SEK*.

Subscriptions: The company has received subscriptions of approximately 7 m DKK, a total of approximately 60 percent of the issue volume. The company has received gratuitous guarantees from existing owners in the company of approximately 1.8 mDKK, a total of approximately 15 percent of the issue volume. The guarantee subscription is agreed from top to bottom, meaning that the guarantee subscription is only activated if the rights issue is not fully subscribed.

Listing on Spotlight Stock Market: Risk Intelligences share is scheduled to be listed on Spotlight Stock Market. The first day of trading is scheduled to commence on August 17, 2018.

ISIN-code: DK0061031978.

**Exchange rate approximately 1,364 DKK / SEK.*

Reference to the memorandum

All investments in securities are associated with risk. In Risk Intelligence memorandum a description of potential risks associated with the company's business and its shares is presented. Before making an investment decision these risks together with the other information in the full memorandum should carefully be read. The memorandum is available on the company's, Spotlights and Sedermera Fondkommission's respective websites: (www.riskintelligence.eu) (www.spotlightstockmarket.com) (www.sedermera.se).

Sedermera Fondkommission acts as financial advisor and Nordnet Bank AB is the Selling Agent in connection with the rights issue and planned listing on Spotlight Stock Market.

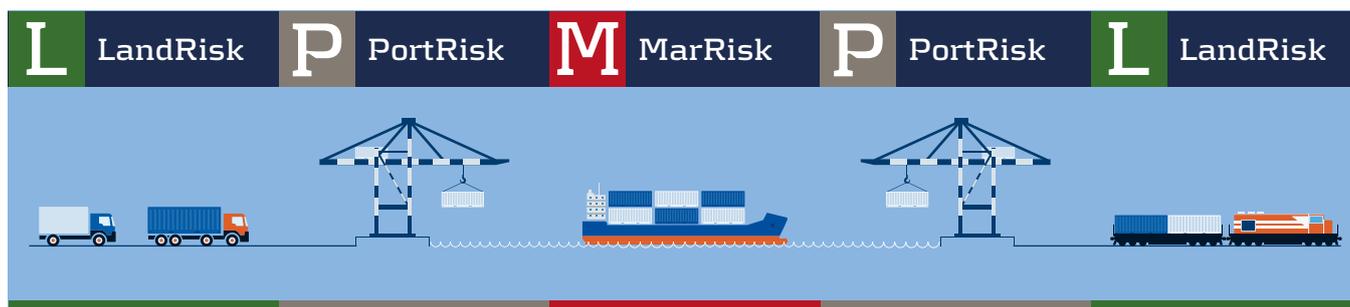

Risk Intelligence – Introduction

Risk Intelligence is a leading global provider of critical information and recommendations on security threats around the world. Of these threats, a significant majority are from terrorists, insurgent groups, organized crime and piracy, which expose personnel and assets to immediate danger.

- **Profile:** Risk Intelligence was established in Denmark in 2001 and is a global leader in risk intelligence and risk assessments for companies operating in the shipping, gas, oil and offshore segment. The company offers its intelligence via a digital platform, the Risk Intelligence System (MaRisk + PortRisk), which presents a comprehensive global view of real time environment risks for maritime and port areas.
- **Product:** Currently, the Risk Intelligence technology platform and related subscriptionbased services cover maritime security (MaRisk) and security risks in ports (PortRisk).
- **Business model:** The company sells annual licenses with automatic renewal and payment 12 months in advance. Hence, the business model is based upon recurring revenue with 98% subscription renewal and marginal costs close to zero.
- **Direct customers:** The company has acquired more than 100 private and public customers, including the largest oil and gas companies in the Western world, as well as a number of leading shipping and offshore companies.
- **Past performance:** Risk Intelligence has grown organically until 2017, with a current annual turnover of approximately 11 mDKK and an EBITDA of approximately 0.5 mDKK.

Risk Intelligence – Potential

- **Strategy:** The Company has developed a scalable technology (Service as a Software) and expects strong growth in both existing and future operations in conjunction with its entry into a 20-fold larger market (LandRisk).
- **Clients:** Risk Intelligence's current client base is estimated to be approximately 12 percent of the world's total trading fleet. Current clients include global shipping, offshore and oil companies. There is a large additional sales potential for the Company, with all existing clients. Risk Intelligence has a strategic partnership with the leader in Marine Fleet Tracking - Pole Star, which sells user licenses to its customers. By end of 2018, the Risk Intelligence System is expected to be integrated into the Pole Star system. Similarly, in May 2018, Risk Intelligence has entered into an agreement with GNS, the world's largest distributor of charts for integration of Risk Intelligence System in GNS services.
- **Scaling:** Risk Intelligence already has a profitable and scalable business model. The Company is ready to expand into a new business area by developing a security risk management module for land risks. With this expansion, the Company can link a whole chain of identification and selection of risks and threats, both on land, in ports and at the sea. Mirroring its successful formula from when PortRisk was added to the original service of MaRisk, Risk Intelligence has signed an agreement with an existing, significant customer which will be a part of the Company's pilot project for the LandRisk technology and service development.
- **Future Performance:** By end of 2020, after an 18-month investment period with anticipated smaller losses, the company expects to more than triple its revenue (relative to 2017) and expects to reach a profit of 5 mDKK (EBITDA). In the years thereafter, the EBITDA-margin is expected to climb to about 30% due to the almost incremental cost-free scalability of its service.
- **Vision:** Within 10 years, the Company expects to capture a significant share of 10 to 20 percent of the global risk intelligence market, which is estimated to between 1 and 2 bnDKK.

CEO Hans Tino Hansen

"When I describe Risk Intelligence's business, I often find it more difficult to explain that our turnover adds to "only" 11mDKK at the present time than to explain how / why we will achieve three-figure millions in revenue. Then I have to explain 1) that we have deliberately developed the business and technology both carefully and self-financed until 2017 and 2) that we are now ready to reach for the much greater potential. We expect that world trade, and the risk level will continue to increase. This represents an opportunity to multiply our business manifold in the years to come and with the planned IPO we will fund the next steps on that journey."

The cost of shipping of goods by sea, port and land-transportation, amounts to an incredible 2,700 billion USD each year¹. Competition and the need for optimization is intense and the number of risks and threats associated with conflicts, terrorism, and crime continues to increase. In this vibrant global landscape, it is extremely important to understand the risk and consequences of international events and threats. In essence, factors that affect operations and supply chains are mission critical and crucial for achieving business success.

Our value proposition is to address just that: By combining intelligence, technology and analysis, we have become a globally recognized market leader in security and risk management and today our client base represents around twelve percent of the world's merchant fleet, i.e. our clients operate twelve percent of the world's total merchant fleet.

Through our digital platform, the Risk Intelligence System, we present a comprehensive, global view of real time environment risks for maritime, port and terminal areas. Our system provides monitoring and in-depth analysis of threats (including insurgency, piracy, organized crime, terrorism, military conflicts and the interplay between them) and enables our clients to plan, assess and perform their operations in hazardous areas. We identify where serious events occur and presents an assessment of the level of risk in each area. This allows companies to easily evaluate both current and future security risk by using one unique, complete and integrated system, that is available 24/7.

Now time has come to further scale up the business. We have identified the opportunity by listening to our existing customers: The industry seeks a fully integrated system to evaluate security risk throughout the supply logistics-chain. Hence, Risk Intelligence plans to expand its service

to include land risks through the LandRisk module. The Risk Intelligence System will then be able to monitor the entire supply chain (MaRisk + PortRisk + LandRisk).

The market for maritime riskproducts is estimated at around 200 - 300 mDKK annually. We estimate to address 50 percent of this market, which means that Risk Intelligence Addressable Market amounts to approximately 100 - 150 mDKK in maritime risk products. Our future market for land risks is estimated at 3 - 5 bnDKK annually, of which approximately 1 - 2 bn DKK of this market is addressed to the Company.

We have built our company over almost two decades at a modest pace, self-financed until 2017 and brick-by-brick so to say with very limited sales and marketing resources. Today, the core of our service is our data, our knowledge and the technology, a System, that is very scalable within our existing market as well as into the much larger LandRisk market, which by the way is based largely upon the same threats as those that we already monitor. During the course of the next 10 years, this converts into a unique and real opportunity to scale our business at pace towards a market share of 10-20% of the total addressable market of 1 - 2 bnDKK and with significant profit-margins of about 30% as a result.

In order to fund the next steps towards this potential, we intend to list on the Spotlight Stock Market. The IPO proceeds of approximately 12 mDKK will be deployed to further develop, integrate and launch LandRisk during the course of 2018 and 2019.

I cordially invite you to join us on our exciting journey as investor in Risk Intelligence.

Hans Tino Hansen
CEO and founder of Risk Intelligence
