

LandRisk

LandRisk provides you with up to date global security intelligence for the land-based supply chain and logistics operations.

Introducing LandRisk as the third module of the Risk Intelligence System will provide customers with a single point of access for all relevant transportation security risk intelligence.

LandRisk includes:

- Country, Area, City and Hotspot threat analysis
- Route planning tool underpinned by AI
- Integrated fleet tracking through API
- 24/7 access to Risk Intelligence Duty Watch team
- Incidents database
- Incident notification services

LandRisk Enables:

- Raised situational awareness
- Informed decisions
- Access to analysed data which is updated and verified by security professionals
- You to focus time and resources on your core business
- 24/7 oversight, assessment and updates on incidents

LandRisk Beta Test

The beta version of LandRisk is undergoing testing. The final product is expected to launch in Q4 2019, but you can use the beta-version now. Once approved as a beta tester, you get free access to LandRisk until the final product is launched.
