

# LandRisk

LandRisk provides you with up to date global security intelligence for the land-based supply chain and logistics operations.

Introducing LandRisk as the third module of the Risk Intelligence System will provide customers with a single point of access for all relevant supply chain security risk intelligence.

LandRisk includes:

- Country, Area, City and Hotspot threat analysis
- Route planning tool
- Integrated fleet tracking through API
- 24/7 access to Risk Intelligence Duty Watch team
- Incidents database
- Incident notification services

LandRisk Enables:

- Raised situational awareness
- Informed decision making
- Access to analysed data which is updated and verified by security professionals
- Busy staff to focus time and resources on their core business
- 24/7 oversight, assessment and updates on incidents

## LandRisk free trial

Adding LandRisk to the existing maritime and port security modules on the Risk Intelligence System, will provide security risk intelligence for the complete supply chain in one integrated system with a single point of access.

Request a free trial of the entire Risk Intelligence System or LandRisk module only
